

OneWebPrint

Connect with your customer's world, anytime, anywhere

You can increase orders and produce jobs more efficiently without the complexities of a massive IT investment.

Sounds too good to be true? Then you should consider OneWebPrint, powered by Online Print Solutions – a modular platform of web-to-print solutions delivered by the Fuji Xerox OneSolution Endless Possibilities hosted solutions platform.

OneWebPrint - make it easy to win new business.

OneSolution Endless Possibilities from Fuji Xerox is a full range SaaS application and professional services consultancy that provides Cross-Media Publishing tools, Web-2-Print Digital Storefronts and Photo Gifting capability on a subscription basis.

To enable these scalable solutions, Fuji Xerox leverages “cloud computing” technologies supported with 30 years of industry expertise in graphic communications, workflow automation and business development. One Solution Endless Possibilities gives you the tools and expert assistance to expand your business and grow your profits by offering exciting new services to your customers – all with no outlay and minimal IT resources.

The unique business model of OneSolution Endless Possibilities means that you can start working on your business rather than in your business. A subscription to OneWebPrint gives you secure access to a scalable web-to-print platform, hosted “in the cloud” and maintained and supported by Fuji Xerox.

Build customer relationships

With OneWebPrint, building your customer relationships and increasing your efficiency with web-to-print has never been easier.

No capital investment is required. A monthly subscription to OneWebPrint gives you:

- a personalised portal that you control
- a way to reach more customers regardless of their location
- stronger relationships with your existing customers to receive more jobs

OneWebPrint is available 24/7, so your customers can submit jobs securely and re-order existing jobs over the internet from virtually anywhere.

Increase production efficiencies

With the simplicity of OneWebPrint and the improved buying experience for your customers, you produce more profitable jobs in less time.

OneWebPrint is not just a storefront. It is a complete web-based ordering system with built-in PDF file conversion for offline files and automatic pre-flight to reduce rework and waste - so you can maximise your return on assets.

OneWebPrint streamlines total fulfilment with automatic job routing to print devices through seamless integration with WaSP (Workflow Automation Services Platform). This delivers a true end-to-end automated workflow that supports both digital and hybrid print providers of all sizes, so you can improve job turnaround times, throughput and capacity.

Grow your business

Don't just provide your customers with an online web portal to order static marketing collateral. With OneWebPrint you can deliver real value for their marketing dollar with variable data printing and dynamic publishing. You can define the business rules and collaborate on design to maximise your value to your client and your profit margin.

Ultimately, you need simple yet robust solutions to expand your business. By leveraging web-based solutions, you can better connect with your customers, receive jobs faster, track them more efficiently within your production facility, and enhance your pricing capabilities.

OneWebPrint Application Modules

Corporate Storefront

Intuitive Job Ticketing and Estimating

Web-to-Print Storefronts

OrderDesk is the core building block of the OneWebPrint platform. It is a central online ordering facility for fulfilment, on-demand and template items such as forms, sales collateral or business stationery. OrderDesk allows users to drill down in an unlimited hierarchy of categories and products. It also supports the roll-out of individually branded storefronts, each one supporting advanced and varied customer structures and a multi-level order approval framework.

Job Submission and Job Estimator

Customers can now submit documents in virtually any file type. NexJob converts documents into PDFs on the server and presents them to the customer for a visual approval with job pricing based on finishing options.

Order information such as printing and finishing options, as well as delivery instructions, can also be included. Customers can also price the job online.

Retail Store Front

Dynamic Publishing

Dynamic Publishing

GroupCanvas is a dynamic, collaborative publishing platform that provides the flexible capabilities customers need to produce any type of variable document. The design control and powerful graphic design features of GroupCanvas make it ideal for corporate, marketing and retail print environments. Subject to template rules, customers can edit text (font, colour, size, etc), images (crop and resize) or page layouts, directly on to the page using the OneWebPrint design interface. With the necessary authorisations they can also draw text or image boxes. All areas of a project can be locked down or opened to customisation, depending upon template rules.

The “Live Session” module enables multiple users in remote locations to design artwork together, in a real-time virtual team environment. Once an invitee joins a design session, all participants view the same screen and they can all make design changes to either a printed piece or an HTML page.

The power of “OneSolution Endless Possibilities”

OneWebPrint’s total integration with Fuji Xerox’s other “OneSolution Endless Possibilities” products gives you greater connection with your customers, improved workflow efficiency, added value to your bottom line, and an injection of new vitality into your business.

If you’re looking for a web-to-print solution which can build customer relationships as well as your business, OneWebPrint is made for you.

About Fuji Xerox Australia

Fuji Xerox Australia is part of a world leading enterprise for business process and document management services. Through the implementation of efficient business processes and effective communication, we deliver the right information to the right people in the right format. A continuous source of innovation helps us optimise IT and print infrastructures to deploy document strategies that are efficient, productive and waste-free. This enables our customers to meet their business challenges in new ways with measurable results.

Protecting the environment is fundamental to our commitment to corporate citizenship. Fuji Xerox Australia provides products that have been designed with both our customers and the environment in mind. We are known for our end-of-life product resource recovery and remanufacturing programs. Our products regularly lead the industry in energy performance and all our sites maintain ISO 14001:2004 Environmental Management System Certification. Fuji Xerox Australia has been recognised for its achievements in environmental sustainability by the United Nations and the Banksia Environmental Foundation in Australia.
